#### **RELEASE REPORT:**

New releases should be reported to Dan Harper. Once the release has been entered into the database, the leaking site will then be transferred to a project manager.

#### **DIVISION OF SITES:**

The attached table lists past and present tank owners of leaking UST sites and their assigned project manager. In general, one tank owner is assigned to the same project manager for multiple leaking sites, but may be assigned to more than one project manager if necessary. If there is no project manager listed, either the tank owner has no active leaking sites, or a project manager has not been assigned.
